Indira Gandhi Institute of Development Research (IGIDR), Mumbai

M.A. in Economics 2015-2017

Jawaharlal Nehru University, New Delhi

B.A. (Hons.) in Economics 2012-2015

University of Delhi, New Delhi

Research Interests

Applied Microeconomics (Gender, Labour, Health), Development Economics, Political Economy

Job Market Paper

Education Tracks and Gender Role Attitudes

Abstract: We estimate the causal effect of general versus vocational secondary education on gender role attitudes. Using a fuzzy regression discontinuity design that exploits a preparatory exam score cutoff, we find that general secondary education substantially increases support for gender equality. General secondary graduates are 16 percentage points more likely to agree that women should be allowed to work and 24 percentage points more likely to support women in leadership, relative to vocational graduates. These effects are larger among male graduates than female graduates. Exploring mechanisms, we find evidence that track assignment operates through differences in access to higher education, exposure to female coworkers, peer composition, and curriculum content. Our findings suggest that expanding social and civic content in vocational curricula and broadening higher education pathways for vocational graduates could promote more egalitarian gender attitudes and advance gender equality.

Working Papers
